We only do three things. First, we build great website. Second, we take great care of our customer. And third, we tell the world about it. That's it. Three things. Anything else is a distraction.

Administrator Permission Roles on Website and Store Levels

Leverage Magento's multi-store functionality to create multiple sites, and with the Enterprise Edition you can restrict access roles so that staff view only the data for the stores relevant to them.

Logging of Administrator Actions

Track and review all actions taken by administrator users, with the ability to see views, edits and deletions of information. Logs are associated to specific administrator users, with the ability to see the action taken, when it was made, and more.

Gift Certificates/Cards (Physical and Virtual)

Allow customers to purchase physical (physical card mailed to recipient) and virtual (code provided via email to recipient) gift certificates/cards. Customers can include a personal message when purchasing, and recipients can use the value to purchase items as credit in the store.

Customer Store Credits

Store Credits can be created and tied to customer accounts, for instance orders can be refunded for store credit, and customers can use the credit to purchase items during checkout.

Content Staging and Merging. Support for both on-demand and scheduled merges and rollbacks of content.

Create a staging site to test new categories, product information, promotions and more. Content can be merged to the live site after approval, either on-demand or on a scheduled basis.

Category View and Purchase permissions per on customer group (limited catalog access)

Restrict the catalog access to certain customers with the ability to restrict on a category, or global basis, the viewing and purchasing of items.

Private Sales including Events, Invitations and Category access permissions

The ability to restrict the catalog, allow customers and admin users to create invitations, and the ability to create events for limited time sales of products makes the Magento Enterprise Edition the perfect solution for Private Sales.

Strong Data Encryption

Additional encryption and security standards in the Enterprise Edition to support PA-DSS standards ensure that Magento is a fully secure solution.
